### **Ranhill Adopts New Technology for Water Leak Detection**

**KUALA LUMPUR, April 07, 2016** – Ranhill Water Services Sdn. Bhd. (RWS), a subsidiary of Ranhill Holdings Berhad, signed a Memorandum of Understanding (MoU) with a Canadian technology company, Echologics LLC.

“We are exploring to adopt new technology that will make Ranhill more efficient in detecting water leak” said Ahmad Zahdi Jamil, CEO of Water Division, Ranhill Holdings Berhad.

The MoU allows Ranhill to tap into the technologies developed by Echologics, a specialist in the development of acoustic technologies that can non-invasively detect the underground leaks.

“This technology will help us to reduce costs and prioritise capital spending without breaking grounds or disruption of water supply services to end consumers” said Ahmad Zahdi. “This is also aligned with the Government’s plan of reducing non-revenue water (NRW) to 25% by 2020”. He concluded.

RWS was formed in 2005 to focus on the reduction and management of water leak or NRW. Today, RWS has managed to save more than 430 MLD, enough to supply to more than 450,000 households every day.

The Minister of *Kementerian Tenaga, Teknologi Hijau dan Air Malaysia*, Yang Berhormat Datuk Seri Panglima Dr. Maximus J. Ongkili was present to witness the signing of the MoU.

-ends-

**Ranhill Water Services Sdn Bhd (RWS)** is a subsidiary of Ranhill Holdings Berhad, specialises in the provision of operational, management, construction and consultancy services to meet the needs of water services providers, particularly in the field of Non Revenue Water (NRW) Management.

**Ranhill Holdings Berhad** is a Malaysian conglomerate with interests in environment and power sectors. It provides water supply services, operates water and wastewater treatment plants, and provides specialised services in the management and optimisation of water utility assets. The Company has been granted an exclusive license by the Minister of Energy, Green Technology and Water, Malaysia to provide source-to-tap water supply services to end-customers in the entire State of Johor. Outside Malaysia, Ranhill has 10 water and wastewater concessions, on a BOT, BTO or TOT basis, with an aggregate treatment capacity of 310 MLD. In the power sector, Ranhill develops, owns and operates two 190 MW power plants in Sabah generating 380 MW of electricity.
